

# The City Of Inglewood

## ***SPECIAL COMMENDATION***

*Presented to*

# ***Men's Health Network***

**WHEREAS**, despite advances in medical technology and research, men continue to live an average of five years less than women with Native America and African-American men having the lowest life expectancy; and

**WHEREAS**, educating the public and health care providers about the importance of a healthy lifestyle and early detection of male health problems, will result in reducing rates of mortality from disease; and

**WHEREAS**, men who are educated about the value that preventive health can play in prolonging their lifespan and their roles as productive family members will be more likely to participate in health screenings; and

**WHEREAS**, fathers who maintain a healthy lifestyle are role models for their children and have happier, healthier children; and

**WHEREAS**, the Men's Health Network worked with Congress to develop a National Men's Health Awareness period as a special campaign to help educate men, boys, and their families about the importance of positive health attitude and preventative health practices.

**NOW, THEREFORE, BE IT KNOWN**, that the Mayor and Council Members of the City of Inglewood, California, do hereby recognize Men's Health Network for its outstanding efforts in encouraging all citizens to pursue preventive health practices and early detection efforts.

Presented this 10<sup>th</sup> day of June 2019
