June 10, 2019

Men’s Health Month
PO Box 77476
Washington, DC 20013

Dear Friends:

I am pleased to recognize June 2019 as “National Men’s Health Month” and June 10-16, 2019 as “Men’s Health Week” in the state of Montana.

Men and boys face a broad range of health issues throughout their lifetimes. By educating men about preventative practices, healthy living, and early detection, we can reduce the rates of such diseases as diabetes, depression, mental illness, as well as prostate, testicular, and colon cancers. Men’s health is not just a men’s issue. It affects the lives of family members, friends, and loved ones of all genders.

I commend you and the Men’s Health Network for your advocacy towards positive health attitudes and preventive health practices for men, both young and old. Thank you for your efforts to educate the public about the importance of disease prevention and early detection, and I encourage all Montanans to acknowledge June 2019 as “National Men’s Health Month.”

Sincerely,

STEVE BULLOCK
Governor
